Arm Yourself Against Fraud

Identity theft can happen to anyone of any age but can be a major concern for older adults. According to the FBI, total losses reported to the Internet Crime Complaint Center in 2023 by those over the age of 60 topped $3.4 billion—an 11% increase from the prior year. The average dollar loss per victim was $33,915.*

In this webinar hosted by ID Watchdog, we'll discuss common identity theft scams targeting older adults, ways you can help spot fraud, and steps you can take to better protect yourself from it.
